

SERIES 1600

INSULATION BLOWING MACHINE

Reliable Hydraulic Power With The Industry's
Fastest High Volume Narrow-Body Blower

Do more and bigger jobs with the SERIES 1600 insulation blower - your high production solution. Meyer's newest top-of-the-line, hydraulic drive blower is an all-fiber, full production, large capacity, narrow-body machine that can fit into a nose over cab and deliver fast, accurate, and uniform open blow coverage. The SERIES 1600 features a totally hydraulic drive system that provides power to hopper, feeder and blower. With Meyer's hydraulic design there are no more clutches, transmissions and the associated belts and pulleys.
